**TITLE:                   Combination personal data assistant  
and personal  
                          computing device**

**----- KWIC -----**

**Summary of Invention Paragraph - BSTX (11):**

**[0009] For applications not requiring the full  
functionality of the mobile  
PC system, a user can select the PDA system in  
conjunction with a common  
display and shared peripheral devices, providing a  
reduced power mode operation  
of the computing system. When expanded functionality  
is required of the  
computing system, the mobile PC system is activated or  
given control. The user  
has selectable control over whether the PC system or the  
PDA is activated.**
